Shamar Morrison

Full-Stack Engineer / Tech Lead (React, Next.js, Node.js)

shamar.webdev@gmail.com • github.com/shamar-morrison • www.shamar.online

Jamaica (UTC-5) • Open to Remote (Contract / EOR)

SUMMARY

Full-stack engineer and tech lead with 5+ years building production web and mobile applications end-to-end: React/TypeScript (including React Native) on the frontend, Node.js/Express on the backend. Experienced architecting component systems (Tailwind, shadcn/ui) and evaluating/adopting state management tools (Redux, Zustand) across teams. Comfortable leading technical direction, reviewing code across varied frontend frameworks, and mentoring engineers.

CORE SKILLS

Languages: TypeScript, JavaScript, SQL, Kotlin

Frontend: React, Next.js, React Native, Tailwind CSS, Zustand, Redux, TanStack Query

Backend: Node.js, NestJS, Express, Prisma, PostgreSQL, MongoDB, Firebase, GraphQL, AWS Lambda

Quality: Jest, React Testing Library, automated testing, performance optimization

Design: Figma, Adobe XD, Photoshop, Illustrator, Sketch

DevOps/Tools: GitHub Actions (CI/CD), Docker, Linux, Git, Expo, Sanity CMS, Payload CMS

EXPERIENCE

Lead Software Engineer *Jul. 2021 - Present*

Edufocal Ltd.

- Led a platform modernization (Next.js 14, TanStack Query, Zustand), reducing page load times by 60% and improving overall system reliability by 85%.
- Managed and mentored a team of 5 engineers and 2 designers, improving delivery cycles by 30% while maintaining 99.9% uptime.
- Implemented CI/CD with GitHub Actions, reducing deployment time by 75% and eliminating 90% of post-deployment issues.
- Architected and shipped an educational platform serving 10,000+ users, enabling custom quiz creation/distribution and granular access controls, increasing web-based educator engagement by 40%.

React Native Developer *Jan. 2020 - Aug. 2020*

Herald Ltd.

- Built a feature-rich photo editing mobile app in React Native, reaching 100,000+ downloads and a 4.5-star rating across iOS and Android.
- Implemented automated testing (Jest, React Testing Library), achieving 90% coverage and reducing bug reports by 70%.
- Migrated from class components to functional components with hooks, reducing bundle size by 25% and improving performance.
- Created a reusable component library that cut new feature development time by 50% and improved UI consistency.

SELECTED PROJECTS

AI Dental Management

Next.js, TypeScript, Prisma, PostgreSQL, Clerk, Resend, Vapi AI

- Developed a full-stack dental practice system with an AI voice assistant to support scheduling and patient guidance.
- Implemented secure auth (Clerk), data modeling (Prisma + PostgreSQL), and automated email workflows (Resend).

ShowSeek: Movie & TV Tracker

React Native, Expo, TypeScript, Firebase, TMDB API

Available on Google Play ★ 4.7

- Built a mobile/web app for tracking movies and TV shows, including watchlists, episode tracking, and real-time sync with Firebase.
- Integrated TMDB API for discovery/search and personalized recommendations; implemented Google Sign-In, guest mode, and Firestore persistence.

Recurr: Subscription Manager

React Native, Expo, TypeScript, Firebase, Push Notifications

Available on Google Play

- Developed a subscription tracking app with automated renewal reminders via push notifications.
- Designed UX for categorizing and visualizing expenses; implemented local + cloud sync with Firebase.
